The Chronologically Sixfold Transcendental Unific Liberation Ontology Truth on the Masterful Noble Middle Way unto the Emancipating Immortal Light Abode of the Ultimate Supreme Absolute Perfection, Abridged

Chronologically 1<sup>st</sup>, Hierarchically 2<sup>nd</sup>, Pre – requisite for 2<sup>nd</sup> Noble Truth :  
 The timeless indiscernible Primordial Ignorance grasped by the Intellect actualizes Craving/Agitation, becomes the Burden – Carrier condition, leads to Suffering for that Person

Chronologically 2<sup>nd</sup>, Hierarchically 2<sup>nd</sup> towards 3<sup>rd</sup>, 2<sup>nd</sup> Noble Truth :  
 The Ignorant Intellect in Craving/Agitation begets rebirth conjoined with Lusts leads to dissolution of ones very being both here and there, Transmigrates in becoming and in unbecoming through Craving/Agitation, is the Genesis of Suffering

Chronologically 3<sup>rd</sup>, Hierarchically 3<sup>rd</sup> towards 2<sup>nd</sup>, 1<sup>st</sup> Noble Truth :  
 The Ignorant Intellect in Contact with Corporeal Identity, Birth, Old Age, Death, Sorrow, Lamentations, Pain, Misery, Gloom, Conjoinment with the Despised, Separation from the Beloved, not getting what you desired, the Five Aggregates of Forms, Feelings, Perception, Experiences, Consciousness, is Suffering

Chronologically 4<sup>th</sup>, Hierarchically 3<sup>rd</sup> avoiding 2<sup>nd</sup> seeks the Way penetrating through the 2<sup>nd</sup> towards the 1<sup>st</sup>, 4<sup>th</sup> Noble Truth :  
 The Ignorant Intellect that Completely Subjugates the conjoinment to Craving/Agitation and Lusts, abandons them in returning into the Supreme Emancipation from further dwelling in Desires, is the Subjugation of Suffering

Chronologically 5<sup>th</sup>, Hierarchically 3<sup>rd</sup> towards becoming the 1<sup>st</sup> or descends back in failure towards the 2<sup>nd</sup>, 4<sup>th</sup> Noble Truth → Noble Tenfold Path :  
 The Process of the Purification of the Intellect without Craving/Agitation, without Ignorance goes unto the Subjugation of Suffering and returning to the Light(wazing) via : 1<sup>st</sup> Vision of Revelation of Perfection : Penetrating Knowledge into Nature of the Four Noble Truths, 2<sup>nd</sup> Vision of Unity – Insight of Perfection : Unity – Insight : on Manifolds Karma Formations, into the unchanging Light, into deathlessness, 3<sup>rd</sup> Illumination on Doctrine of Perfection : To separate from the heresy of worldly : perpetual rebecoming, aggregated mixing, manifold being, duality which is void, 4<sup>th</sup> Illumination on Disembodiment of Perfection : To separate from worldly : darkness(waning), partaking of attachments in this life, plurality in endless desirous faring on O' this world, 5<sup>th</sup> Illumination on Soul – Conjoinment of Perfection : Those who forsakes his soul being in manifold plurality, the soul is perfected by the Soul's conjoinment with Perfection, 6<sup>th</sup> Release unto Separation – from – manifoldness of Perfection : Those that burns in the powerful lifting up from mental formations beholds separation – from – manifoldness in powerful and mighty obtainment such that they begets the bringing forth great resolve : so that phenomena do not arise, that the root of wickedness is not begotten to be born such that would befall evilness, in abandoning arisen phenomena and the roots of wickedness which have arisen upon them, to cause wholesome Dharmas which have not arisen upon them to now be begotten unto them, that wholesome Dharmas which have arisen will be everlasting in them, and that unparalleled exquisite unity may become greater and greater in them until fulfillment of becoming is supremely perfected, 7<sup>th</sup> Release unto Reflective – Conjoining of Perfection : Those that has extricated the Self in proper guiding from both desirous covetousness and dejection of this world, and has possessed of vigilant unity in burning meditateness of recollective – conjoining of the origin, by wisdom's blazing vigorosness of intent in beholding : what is the body, feelings and sensations, mental formations, phenomena, and what is antecedent in origin prior to these arisings thereof, 8<sup>th</sup> Release unto Unity – Conjoinment of Perfection : Those that has : Extricated the Self from sense – desires, wicked – mind formations, is removing unto Unity from evil twisting –and –whirling – about of phenomena and endless faring on O' this world, has extricated from the dark – and – evil – light, absorbs by immersion in golden illumination of sweet exquisite bliss unexcelled, Subdued both the evil twisting – and – whirling – about and the endless faring on O' this world, made conjoinment within Perfection, shines with brightness and clarity in the Unity arisen from the True Self, with exquisite Mind turned in the great becoming towards the unmani[fd – singularity, removed from evil twisting – and – whirling – about and endless faring on O' this world, made Unity Conjoinment absorbs by immersion in golden illumination of sweet exquisite bliss unexcelled, Permeates in absorbing by immersion into that golden illumination passionless, brought unto abiding in disembodied equanimity, deep in recollective vigilant Unity in burning meditateness, their entire being as suffused in exquisite bliss holds conjoinment – abiding within Unity – fulfillment which the Nobles proclaim : "They abide in disembodied equanimity in recollective – conjoinment dwells sweetly in most exquisite bliss unequalled", Transcended bliss – abiding, manifold – existence – suffering, gone to annihilation both joy/happiness and dejection/grief of spirit in many precious existences O' this world; has neither manifold – existence – suffering nor bliss – abidance anymore, most sweetly disembodied of both in recollective – conjoinment of transcendence into exquisite rapture supreme unequalled

Chronologically 6<sup>th</sup> Final/Ultimate, Hierarchically 1<sup>st</sup> Highest/Supreme, 9<sup>th</sup> Supreme Knowledge of Perfection → 10<sup>th</sup> Supreme Release of Perfection → 10<sup>th</sup> Final Supreme Release of Perfection → 10<sup>th</sup> Arising of Supreme Perfection :  
 The One – Person who is no longer inflected by Craving/Agitation nor by Ignorance, is Ultimate Perfection, Thus – come – thus – gone One, That – thou – art Comprehensor, the Self has become the Supreme Absolute

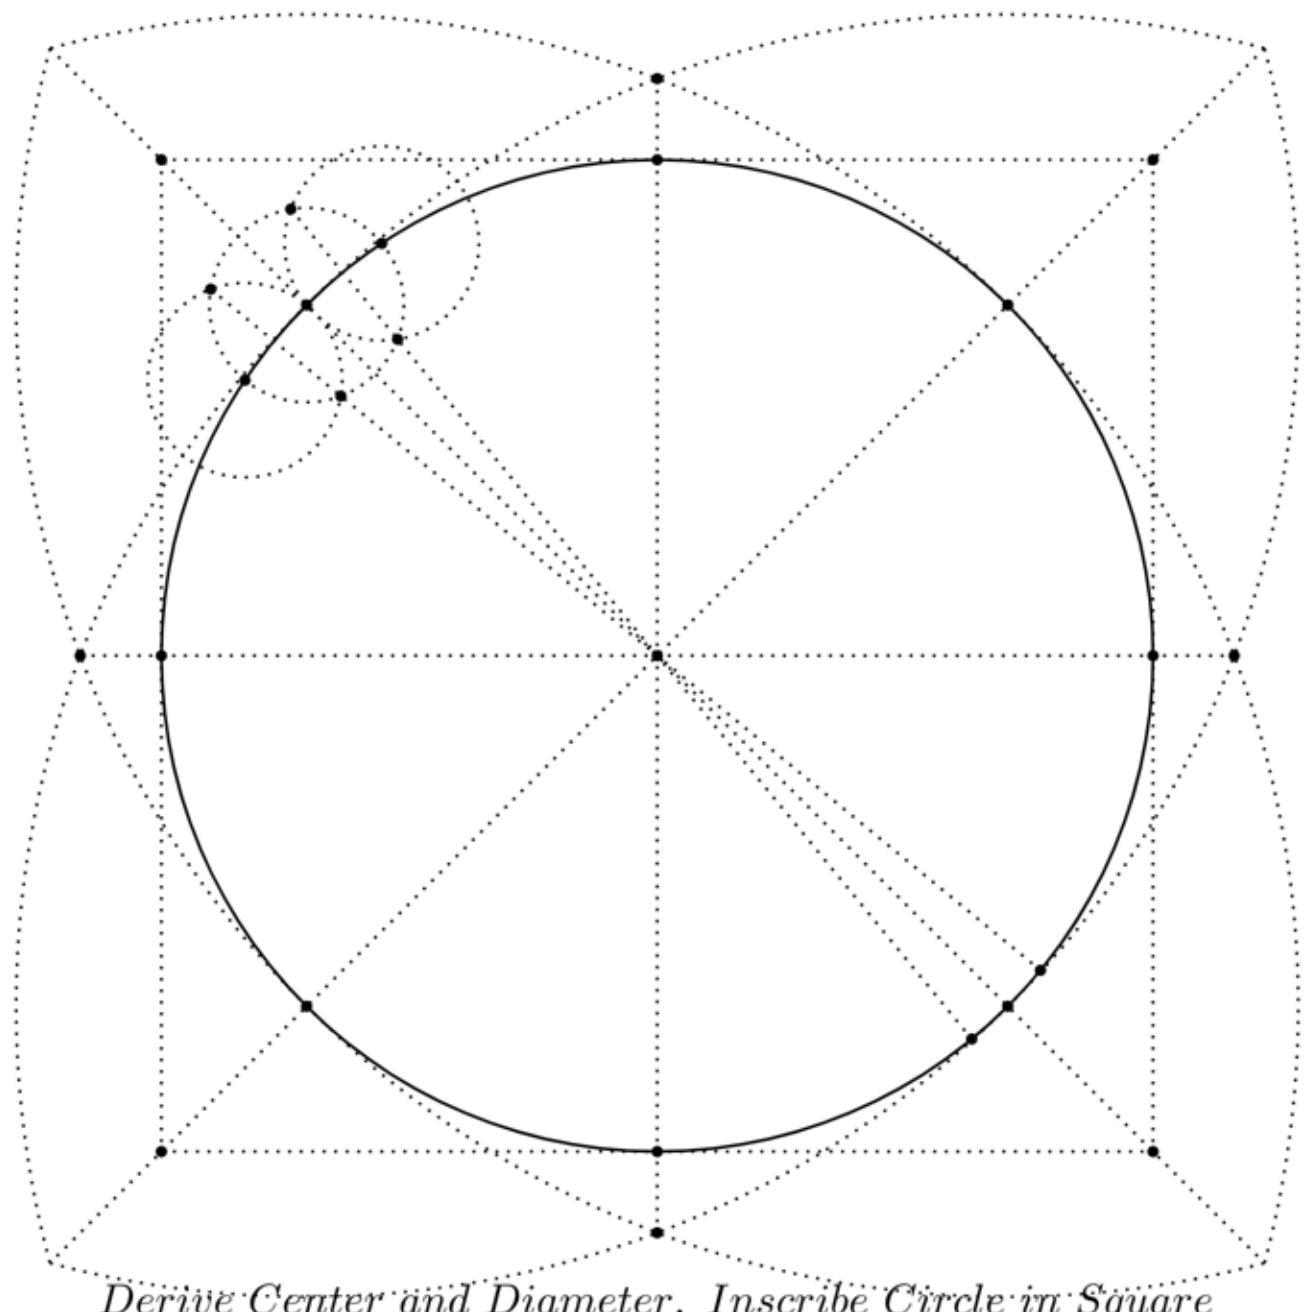

$$\frac{\text{Variable Geometric Mean}^2 \text{ as Multiplier} \times \text{Multiplicand}}{\text{Unit}} = \text{Scaled Product of Given Ratio}$$

Euclid's Elements Book 5 Proposition 12 Commentary :  
 Given a known Product and Geometric Mean Magnitudes placed Perpendicular to each other at a point, one can find its Unit Magnitude by forming its Diagonal from the Geometric Mean and the Product Magnitudes, a Perpendicular line is extended to the point that meets the axis that Product Magnitude lies upon, forms the Unit Magnitude's point that's colinear to the Product Magnitude, of which that point can be used to form another point upon the axis that new Geometric Mean Magnitude lies upon to form another Diagonal and another Perpendicular line to that Diagonal extended to the point that meets the axis that Unit and the Initial Product Magnitudes lies upon, forms the new Product Magnitude scaled in relation to the Unit Magnitude and the new Geometric Mean Magnitude

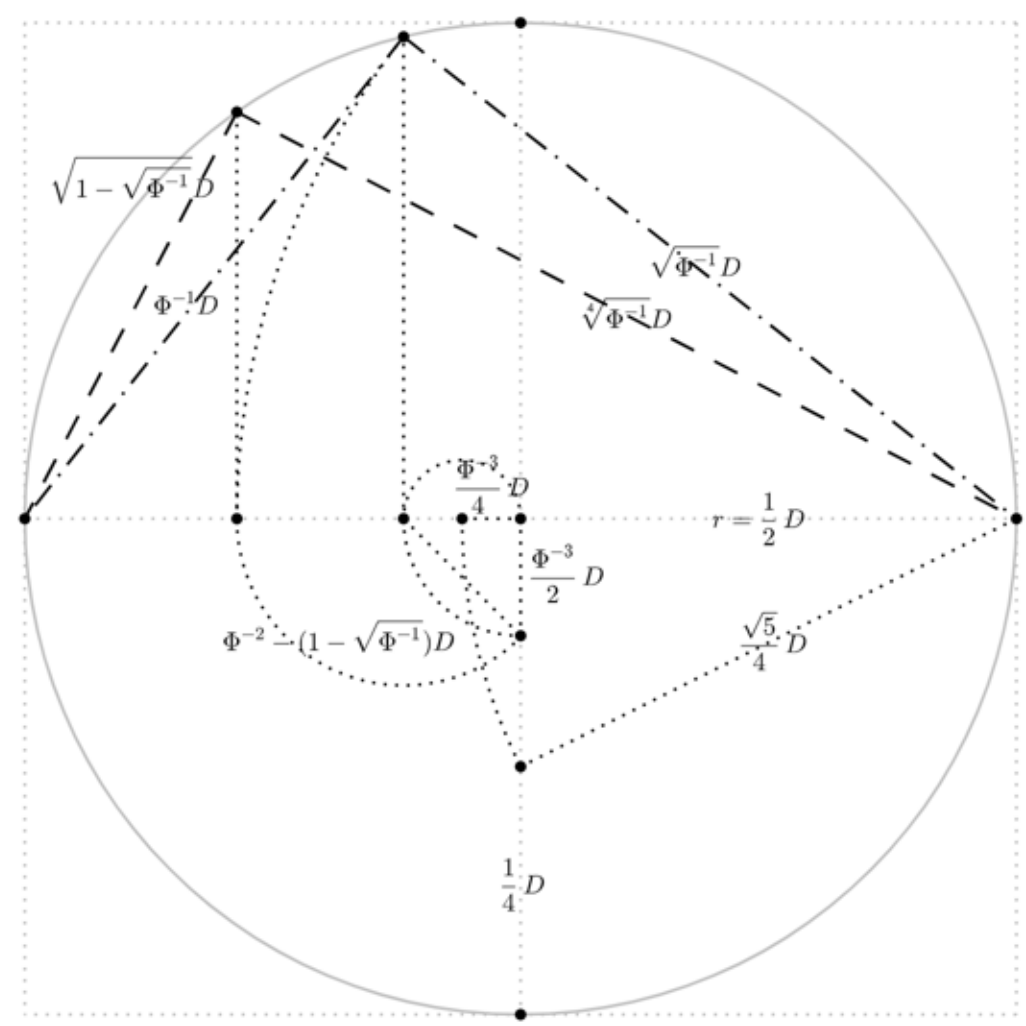

This is called the "Georithmetical Product Scaling through Variable Geometric Mean Theorem"  
 On Spirals Proposition 19 Commentary :  
 Through the "Georithmetical Product Scaling through Variable Geometric Mean Theorem", the radius of any given circle as half of the Diameter of that circle as the Geometric Mean Magnitude and the Circumference as the Product Magnitude, the Area of the circle is realized through multiplying the radius : Diameter as the radius as Geometric Mean Magnitude to itself as the new Geometric Mean Magnitude, while using the Unit Magnitude of the radius and Circumference to form its Diagonal to form it's Perpendicular to form the new Product Magnitude with a measure of one – fourth of the Circumference Magnitude, is the linearized representation of the Area of the circle as a Product Magnitude

Inverse Geometric Mean Magnitude Intervals as Hyperbolic Spiral Analog :  
 Given a known Product, Geometric Mean, Unit, Diagonal Magnitudes, one can extend the Geometric Mean Magnitude by a Unit Geometric Mean Magnitude increments as a Geometric Mean Magnitude Interval, can produce the Product Magnitude accordingly to the same Unit Magnitude before using the Diagonals from the points of the Intervals and its Product Magnitude to then reflect those Diagonals across the Geometric Mean Axis then form its Parallel line at the Unit Magnitude's point away from Origin, forms the Inverse Interval and with a Perpendicular Diagonal, its Inverse Product

Circumscribed 1 unit square meets 1 unit diameter circle at four intersections, the square and circle has internally 360° unity with each other, there's one circumscribed polygon with 1 unit perpendicular midline with 1 unit side  
 Inscribed square area : circumscribed square area = inscribed square side : circumscribed square side = inscribed square side, no inscribed equilateral polygon with 1 unit diagonal with 1 unit side  
 Given an equilateral n → ∞ sided polygon with the same area as the circle, it decreasingly approaches the measure of the circumference of that circle with the same area as that polygon  
 Given an equilateral n → ∞ sided polygon with the same perimeter as the circle, it increasingly approaches the measure of the area of that circle with the same circumference as that polygon

Circumscribed triangle to 1 unit diameter circle has sides longer than 1, circumscribed pentagon to 1 unit diameter circle has sides shorter than 1  
 Any inscribed polygon side is shorter than diameter of 1 unit diameter circle, all inscribed polygons have no direct proportion to the 1 unit diameter circle  
 Only the circle's area square's perimeter side or the circle's perimeter square's perimeter side is also the value of its area

One Circle, Two Squares : [Area Square (Circumference Circle Area) Square Perimeter]

One Square, Two Circles : (Circumference Circle [Area Square Perimeter] Circle Area)

You can't form the square that inscribes the circle with square approximate  $\pi$  using any point that don't cross the tangent of square approximate  $\pi$ , isn't off the angular line from the center to a circle and square approximate  $\pi$  intersection, and isn't off the 1 unit square side/tangent of circle perpendicular to the tangent of square approximate  $\pi$

Three points arise from approximate  $\pi$ , only one point arise from the quotient of  $\frac{4\sqrt{\sqrt{D^2} \div \sqrt{\Phi^2}}}{D}$  as Unit

If  $r = 2$ , Circumference and Circumarea is equal in magnitudinal measure  
Therefore there is only one fundamental constant for both  $C$  and  $A_C$

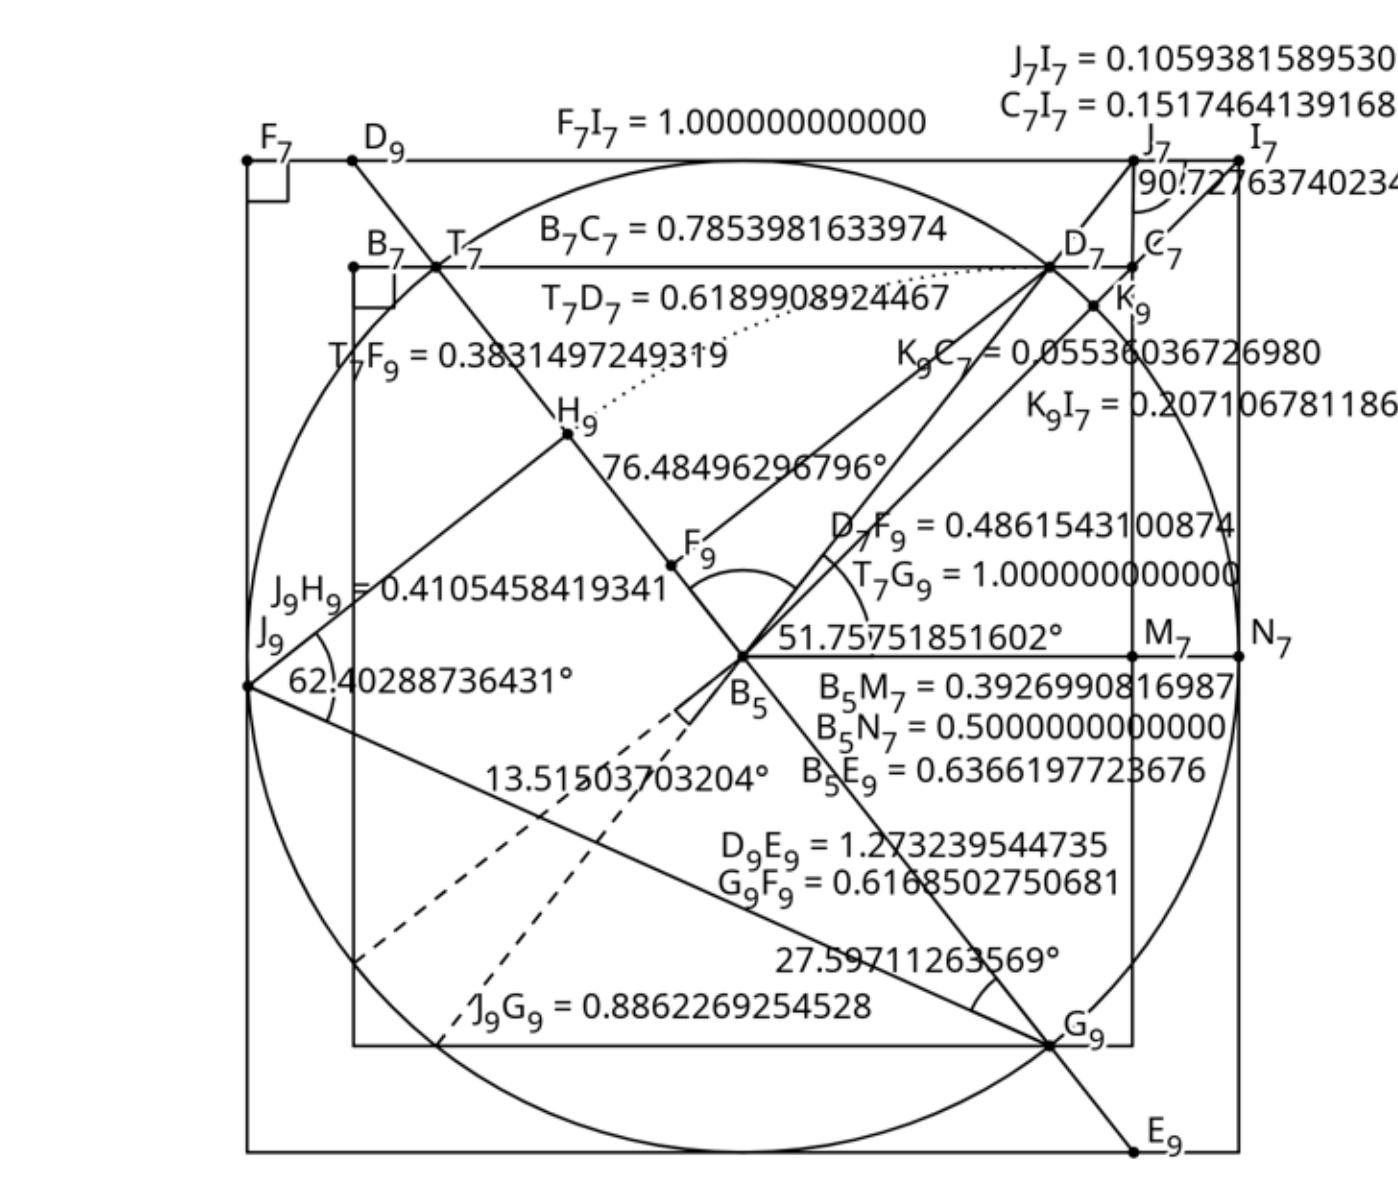

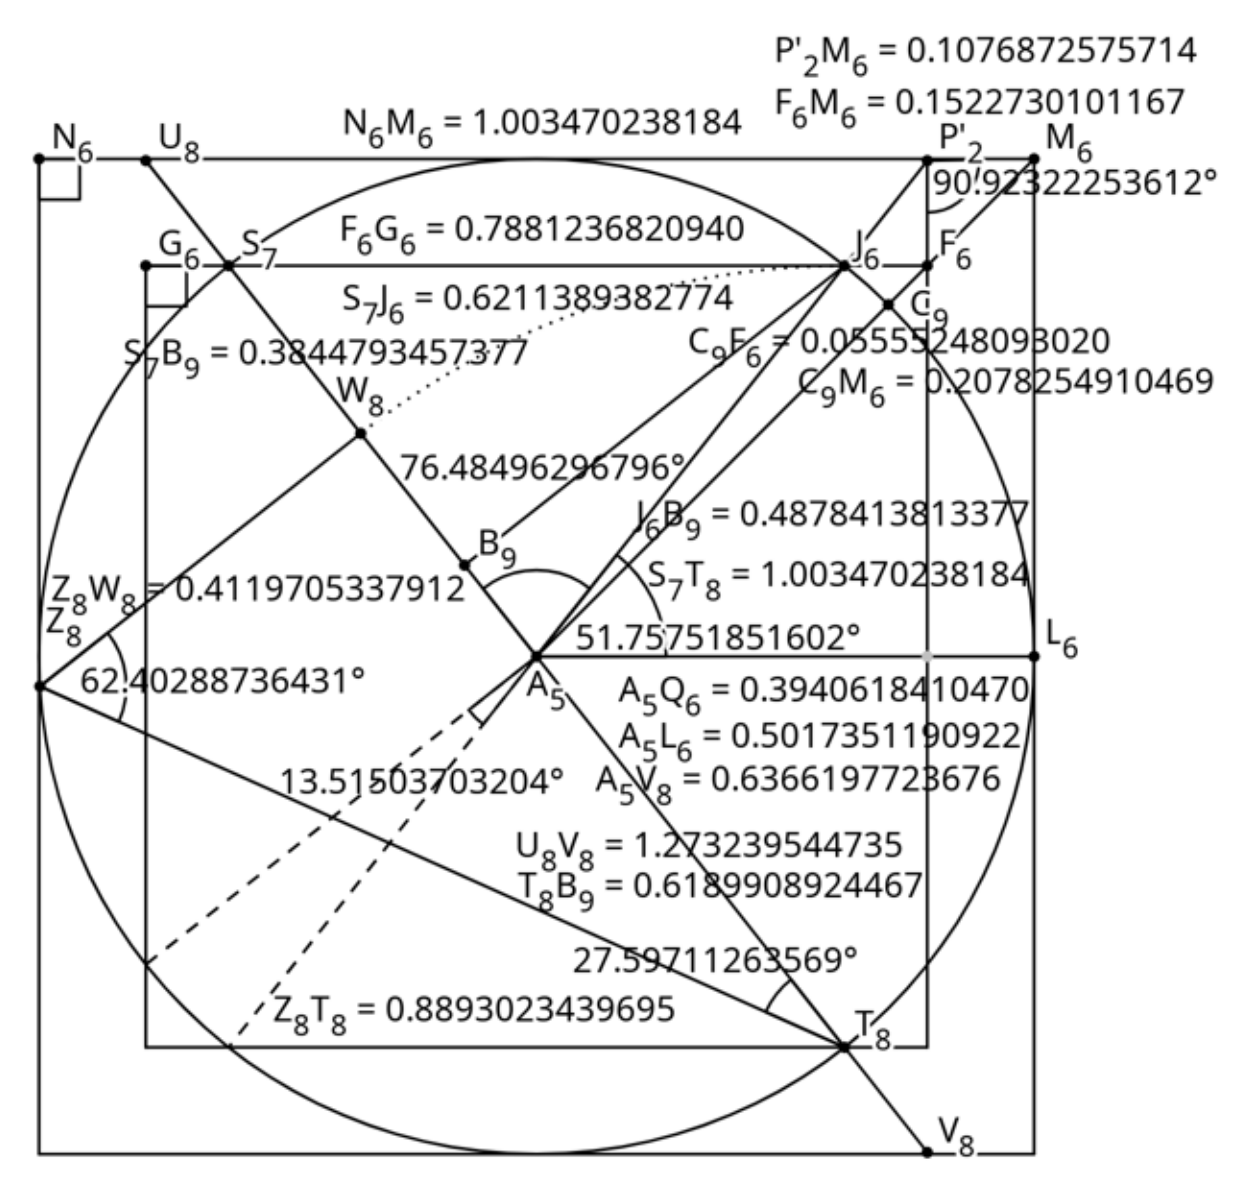

Since the measure of  $C : D$  as  $\pi/D$  as  $4\sqrt{\Phi^{-1}}$  is only itself hiding no proportion different from itself as a circle or square, it remains to be the true logos of " $\pi$ "

Anti "Squeeze Theorem" Circle Approximation Theorem : A centered equilateral  $n$ -gon of either area or perimeter of same measure to a centered circle's area or circumference has all edges forming secants with  $n$ -vertices outside the circle

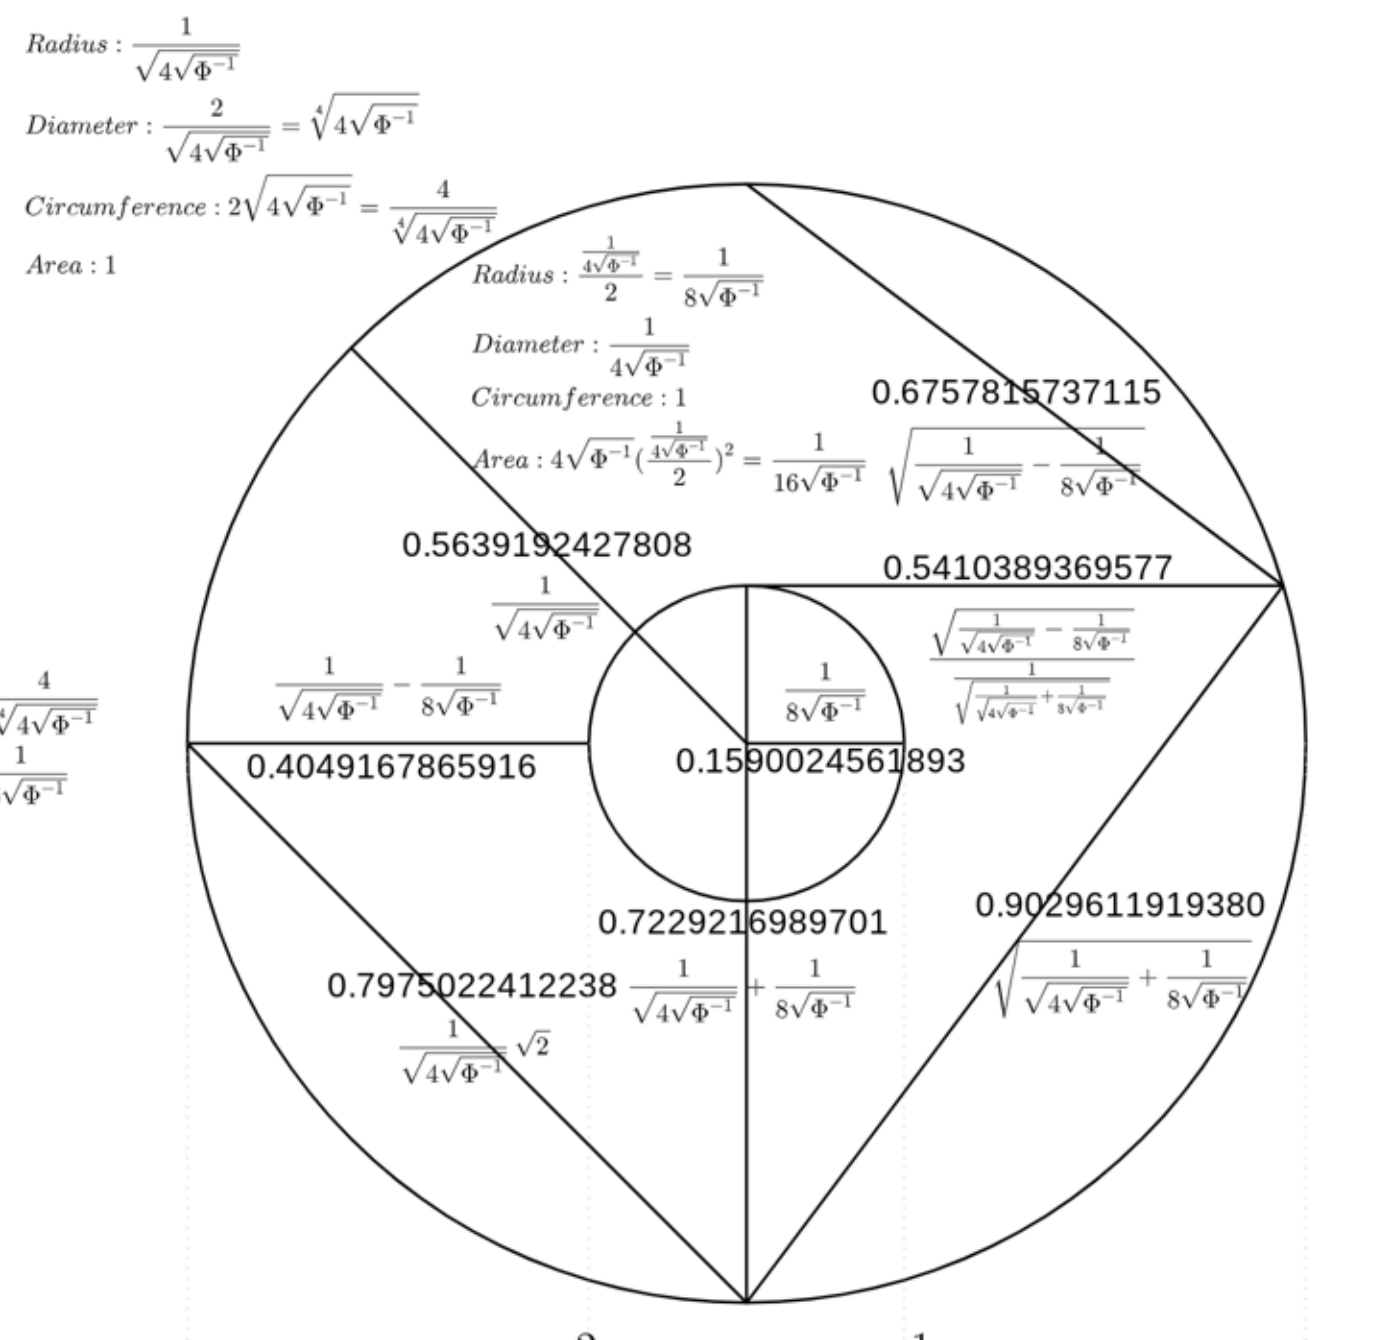

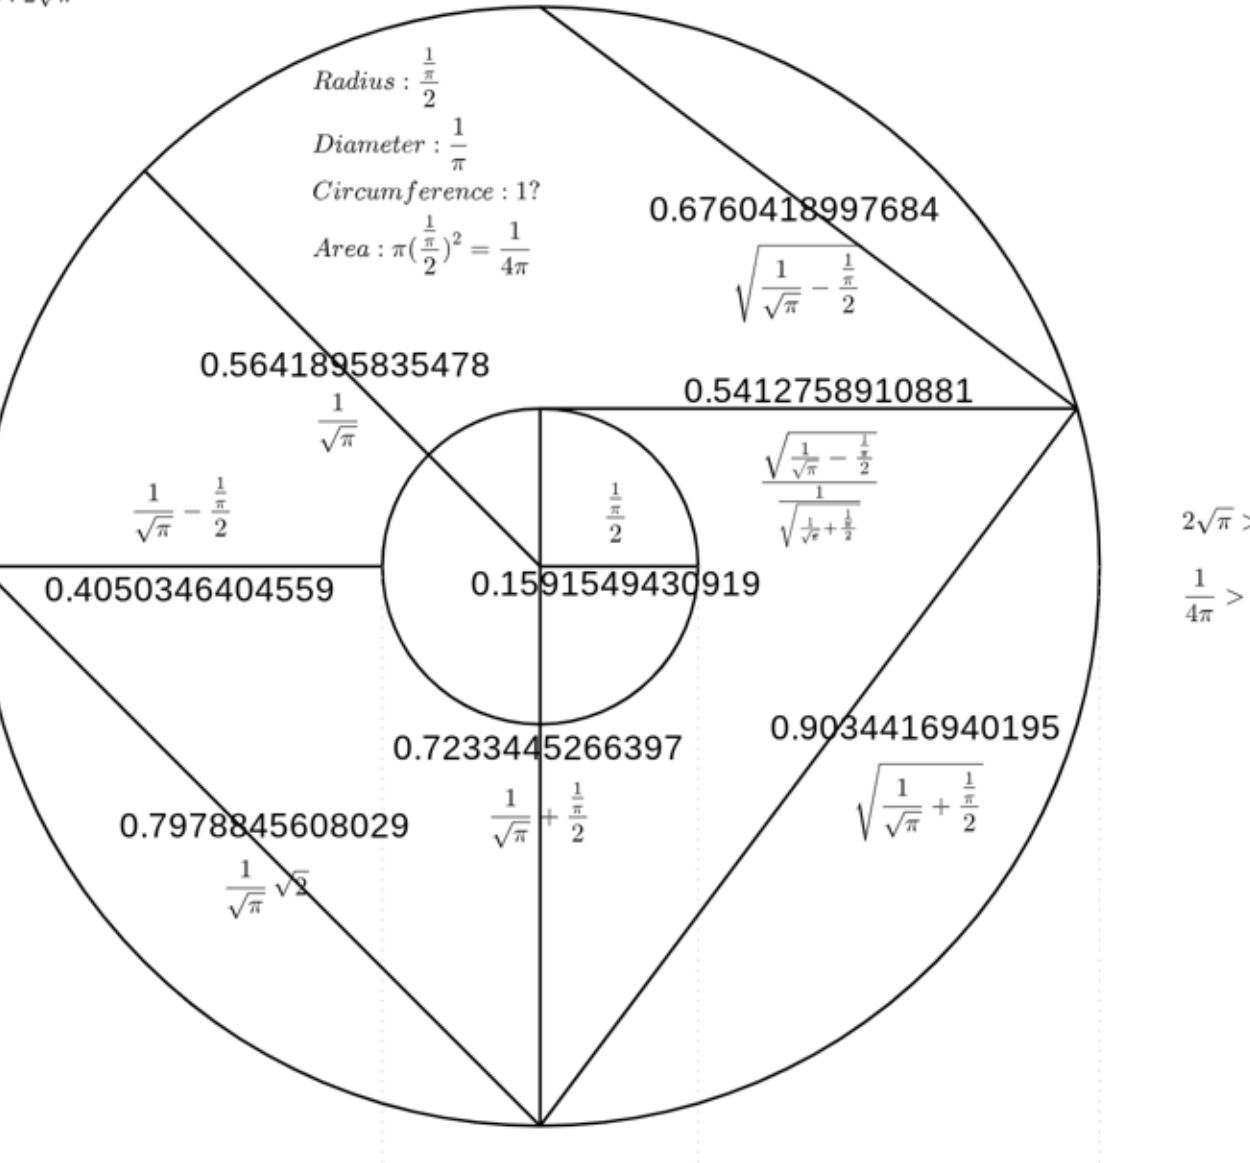

\* all incorrect trailing angle values in this book can be corrected by a factor of  $\frac{4\sqrt{\Phi^{-1}}}{\pi}$

Here lies four examples using greater and lesser approximate  $\pi$  based square perimeter and angle values, none resolves the trilemma  
None of the points on the 1 unit square are perpendicular to the tangent of the approximate perimeter square  $\pi$  value  
Neither the greater nor the lesser approximate  $\pi$ 's square and angle in relation to the circle has any unique property in relation to the 1 unit square  
Only the  $4\sqrt{\Phi^{-1}}$  square resolves the trilemma honestly without using any hidden square
