Knowledge Acquisition Through Inferential Suspension

Reify Attribute (Non)Contradict (Mind)Independent

Void embodies the intangible absence of all,
signifying a conditioned state of absolute emptiness

Point in Void

Symbols of geometric objects are not geometric objects

All Well Formed Concepts Defines Noumena,
Geometry is fully deducible from Void and Location

Void is space as place for location

A magnitude is the concept of size, dimension, extent

A line can finitely extend or dimish indefinitely

Here — *towards* $\rightarrow$ — *Not − Here*

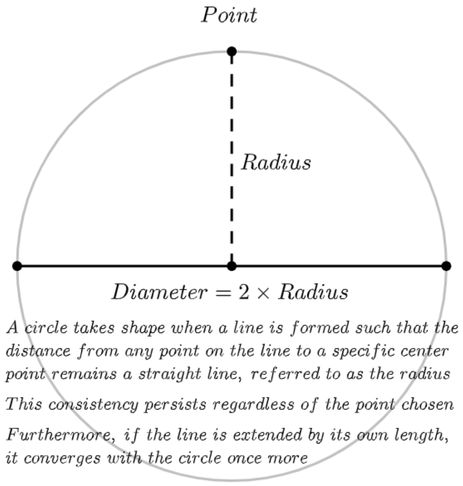

Single Origin — $\leftarrow$ *away* — *Other Points*

Vectors are Unidirectional Paths

Magnitudes are Bidirectional Paths

Magnitude Types : Distance, Mass, Area, Volume, etc.

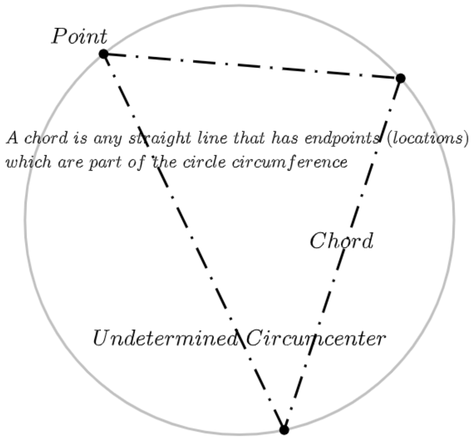

Straight Lines are Primitive Magnitudes

A circle takes shape when a line is formed such that the distance from any point on the line to a specific center point remains a straight line, referred to as the radius

This consistency persists regardless of the point chosen

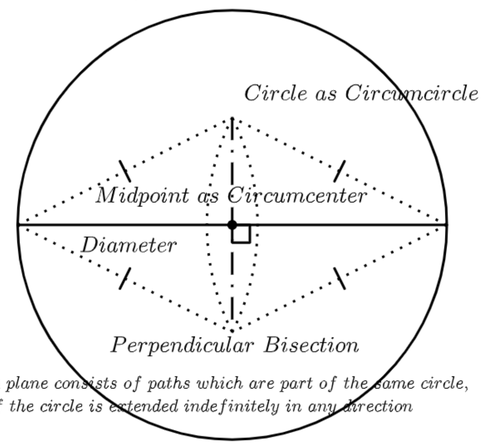

Furthermore, if the line is extended by its own length, it converges with the circle once more

A chord is any straight line that has endpoints (locations) which are part of the circle circumference

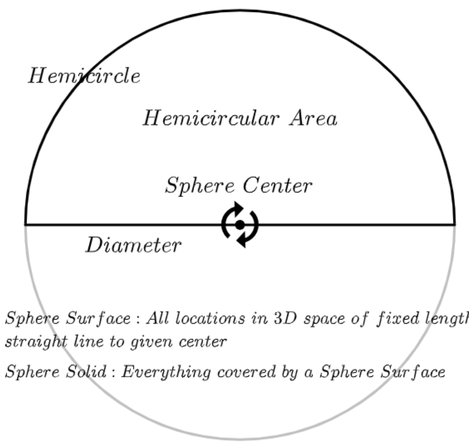

All Void Location Point
Bisect Midpoint Radius Circle

Deriving Circumcenter from Line

A plane consists of paths which are part of the same circle, if the circle is extended indefinitely in any direction

Sphere Solid : Everything covered by a Sphere Surface

Systematic Integration : $Area = tan(f'(xB)) - tan(f'(xA)) = tan(f'(x+h)) - tan(f'(x))$, Derivative : $f'(x) = atan(f(x))$

Historic Geometric Theorem of Calculus : $\frac{f(x+h)-f(x)}{h} = f'(x) + Q(x,h) = \frac{f2}{h} + \frac{f1}{h}$

Derivative : $(f'(x) = \frac{f2}{h}) = \frac{f(x+h)-f(x)}{h} + (Q(x,h) = \frac{f1}{h})$

New Calculus Differentials : $dy = f(x+n) - f(x-m),\ dx = m+n$

New Calculus Integral : $I = \frac{m+n}{k}\sum_{s=0}^{k-1} f'(\mu_s) = \int_{c-m}^{c+n} f'(x)dx$ *where k is the length of each equal partition in a given interval* $(c-m, c+n)$ *and* $f'(\mu_s)$ *is the level (AKA : Arithmetic Mean) y ordinate of* f' *with abscissa* μ_s *and*

$$f'(\mu_s) = \frac{f(c-m+(\frac{(m+n)(s+1)}{k})) - f(c-m+\frac{(m+n)s}{k})}{\frac{m+n}{k}}$$

$$\frac{Variable\ Geometric\ Mean^2\ as\ Multiplier \times Multiplicand}{Unit} = Scaled\ Product\ of\ Given\ Ratio$$

Euclid's Elements Book 5 Proposition 12 Commentary :

Given a known Product and Geometric Mean Magnitudes placed Perpendicular to each other at a point, one can find its Unit Magnitude by forming its Diagonal from the Geometric Mean and the Product Magnitudes, a Perpendicular line is extended to the point that meets the axis that Product Magnitude lies upon, forms the Unit Magnitude's point that's colinear to the Product Magnitude, of which that point can be used to form another point upon the axis that new Geometric Mean Magnitude lies upon to form another Diagonal and another Perpendicular line to that Diagonal extended to the point that meets the axis that Unit and the Initial Product Magnitudes lies upon, forms the new Product Magnitude scaled in relation to the Unit Magnitude and the new Geometric Mean Magnitude

This is called the "Georithmetical Product Scaling through Variable Geometric Mean Theorem"

On Spirals Proposition 19 Commentary :

Through the "Georithmetical Product Scaling through Variable Geometric Mean Theorem", the radius of any given circle as half of the Diameter of that circle as the Geometric Mean Magnitude and the Circumference as the Product Magnitude, the Area of the circle is realized through multiplying the radius : Diameter as the radius as Geometric Mean Magnitude to itself as the new Geometric Mean Magnitude, while using the Unit Magnitude of the radius and Circumference to form its Diagonal to form it's Perpendicular to form the new Product Magnitude with a measure of one – fourth of the Circumference Magnitude, is the linearized representation of the Area of the circle as a Product Magnitude

Inverse Geometric Mean Magnitude Intervals as Hyperbolic Spiral Analog :

Given a known Product, Geometric Mean, Unit, Diagonal Magnitudes, one can extend the Geometric Mean Magnitude by a Unit Geometric Mean Magnitude increments as a Geometric Mean Magnitude Interval, can produce the Product Magnitude accordingly to the same Unit Magnitude before using the Diagonals from the points of the Intervals and its Product Magnitude to then reflect those Diagonals across the Geometric Mean Axis then form its Parallel line at the Unit Magnitude's point away from Origin, forms the Inverse Interval and with a Perpendicular Diagonal, its Inverse Product

The Chronologically Sixfold Transcendental Unific Liberation Ontology Truth on the Masterful Noble Middlemost Returning – Illumination unto the Emancipating Immortal Light Abode of the Ultimate Supreme Absolute Perfection, Abridged

Chronologically 1st, Hierarchically 2nd, Prerequisite for 2nd Noble Truth :
The timelessly indiscernible Primordial Ignorance grasped by the Intellect actualizes Craving/Agitation, becomes the Burden – Carrier condition, leads to Suffering for that Person

Chronologically 2nd, Hierarchically 2nd towards 3rd, 2nd Noble Truth :
The Ignorant Intellect in Craving/Agitation begets rebirth conjoined with Lusts and leads to dissolution of one's very being both here and there, transmigrates in becoming and in unbecoming through Craving/Agitation, is the Genesis of Suffering

Chronologically 3rd, Hierarchically 3rd towards 2nd, 1st Noble Truth :
The Ignorant Intellect in Contact with Corporeal Identity, Birth, Old Age, Death, Sorrow, Lamentations, Pain, Misery, Gloom, Conjoinment with the Despised, Separation from the Beloved, not getting what one desires, the Five Aggregates of Form, Feeling, Perception, Experience, and Consciousness, is Suffering

Chronologically 4th, Hierarchically 3rd avoiding 2nd seeks the Way penetrating through the 2nd towards the 1st, 3rd Noble Truth :
The Ignorant Intellect that Completely Subjugates the Conjoinment to Craving/Agitation and Lusts, abandons them in returning into the Supreme Emancipation from further dwelling in Desires, is the Subjugation of Suffering

Chronologically 5th, Hierarchically 3rd towards becoming the 1st, 4th Noble Truth → Noble Tenfold Path :
The Process of the Purification of the Intellect without Craving/Agitation, without Ignorance goes unto the Subjugation of Suffering and returns to the Light(waxing) via :

1st Vision of Revelation of Perfection :
Penetrating Knowledge into the Nature of the Four Noble Truths,

2nd Vision of Unity – Insight of Perfection :
Unity – Insight :
on Manifold Karma Formations, into the unchanging Light, into deathlessness,

3rd Illumination on Doctrine of Perfection :
To separate from the heresy of worldly :
perpetual rebecoming, aggregated mixing, manifold being, duality which is void,

4th Illumination on Disembodiment of Perfection :
To separate from worldly : darkness(waning), partaking of attachments in this life, plurality in endless desirous faring in this world,

5th Illumination on Soul – Conjoinment of Perfection :
Those who forsake their soul being in manifold plurality, the soul is perfected by the Soul's Conjoinment with Perfection,

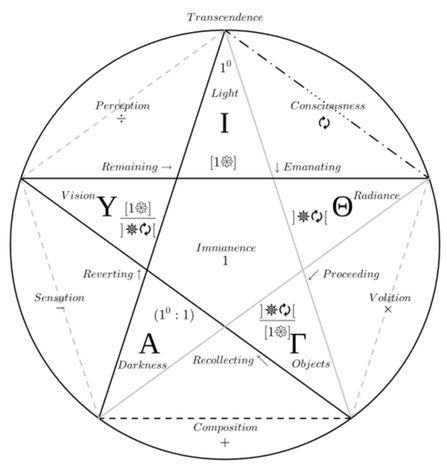

6th Release unto Separation – from – manifoldness of Perfection :
Those that burn in the powerful rising above mental formations behold separation – from – manifoldness in powerful and mighty obtainment such that they beget the bringing forth of great resolve :
so that phenomena do not arise, that the root of wickedness is not begotten to be born such that would befall evilness, in abandoning arisen phenomena and the roots of wickedness which have arisen upon them, to cause wholesome Dharmas which have not arisen upon them to now be begotten unto them, those wholesome Dharmas which have arisen will be everlasting in them, and that unparalleled exquisite Unity may become greater and greater in them until perfection of becoming is supremely perfected,

7th Release unto Recollective – Conjoining of Perfection :
Those that have extricated the Self in proper guiding from both desirous covetousness and dejection in this world, and have possessed vigilant Unity inburning meditativeness of Recollective – Conjoining of the origin, by wisdom's blazing vigorousness of intent in beholding :
what is the body, feelings and sensations, mental formations, and phenomena, and what is antecedent in origin prior to these arisings thereof,

8th Release unto Unity – Conjoinment of Perfection :
Those that have :
Extricated the Self from sense – desires, wicked – mind formations, are removing unto Unity from evil twisting – and – whirling – about of phenomena and endless faring in this world, have extricated themselves from the dark – and – evil – light, are absorbed by immersion in golden illumination of sweet exquisite bliss unexcelled, subdue both the evil twisting – and – whirling – about and the endless faring in this world, make Conjoinment within Perfection, shine with brightness and clarity in the Unity arisen from the True Self, with exquisite Mind turned in the great becoming towards the unmanifold – singularity, remove themselves from evil twisting – and – whirling – about and endless faring in this world, make Unity – Conjoinment and absorb by immersion in golden illumination of sweet exquisite bliss unexcelled, permeate that golden illumination through absorption by immersion; passionless, brought unto abiding in disembodied equanimity, deep in recollective vigilant Unity in burning meditativeness, their entire being suffused in exquisite bliss beholds Conjoinment – Abiding within Perfection which the Nobles proclaim : "They abide in disembodied equanimity, dwell in Recollective – Conjoinment, and dwell sweetly in most exquisite bliss, unequaled!", transcended bliss – abiding, manifold – existence – suffering, gone to the annihilation of both joy/happiness and dejection/grief of spirit in many previous existences in this world; have neither manifold – existence – suffering nor bliss – abidance any longer, most sweetly disembodied of both in Recollective – Conjoinment of transcendence into exquisite rapture supreme unequaled

Chronologically 6th Final/Ultimate, Hierarchically 1st Highest/Supreme, 9th Supreme Knowledge of Perfection → 10th Supreme Release of Perfection → 11th Final Supreme Release of Perfection → 12th Arising of Supreme Perfection :
The One – Person who is no longer afflicted by Craving/Agitation nor by Ignorance, is Ultimate Perfection, the Thus – come, Thus – gone One, That – thou – art Comprehensor; the Self has become the Supreme Absolute

One Circle, Two Squares : [*Area Square* (*Circumference Circle Area*) *Square Perimeter*)
One Square, Two Circles : (*Circumference Circle* [*Area Square Perimeter*) *Circle Area*]

$\square_{\bigcirc}^{Area}:\bigcirc_{\bigcirc}^{Circumference}::\bigcirc_{\bigcirc}^{Area}:\square_{\bigcirc}^{Perimeter}::::\bigcirc_{\square}^{Circumference}:\square_{\square}^{Area}::\square_{\square}^{Perimeter}:\bigcirc_{\square}^{Area}$

You can't form the square that inscribes the circle with square approximate π using any point that don't cross the tangent of square approximate π, isn't off the angular line from the center to a circle and square approximate π intersection, and isn't off the 1 unit square side/tangent of circle perpendicular to the tangent of square approximate π

Three points arise from approximate π, only one point arise from the quotient of $\frac{4\sqrt{\sqrt{D^2}\div\sqrt{\Phi^2}}}{D\ as\ Unit}$

If r = 2, Circumference and Circumarea is equal in magnitudinal measure
Therefore there is only one fundamental constant for both C and A_C

If L, W, H = 1 for formulas below...

$C=\pi 2r=4\sqrt{\Phi^{-1}} \qquad r=\frac{D}{2}$

$D=2r \qquad \pi=C:D \qquad \tau=C:r$

$A_C=\pi r^2=(\sqrt{\frac{C}{4}})^2=\sqrt{\Phi^{-1}}$

$SA_{Sphere}=4\pi r^2=4\sqrt{\Phi^{-1}}$

$V_S=\frac{2}{3\sqrt{\Phi}}$

$CSA_{Cylinder}=4\sqrt{\Phi^{-1}}$

$TSA_{Cy}=6\sqrt{\Phi^{-1}}$

$V_{Cy}=\sqrt{\Phi^{-1}} \qquad l_{Cone}=\Phi-\frac{1}{2}$

$LSA_{Co}=3-\Phi^{-3}$

$TSA_{Co}=3-\Phi^{-3}+\sqrt{\Phi^{-1}}$

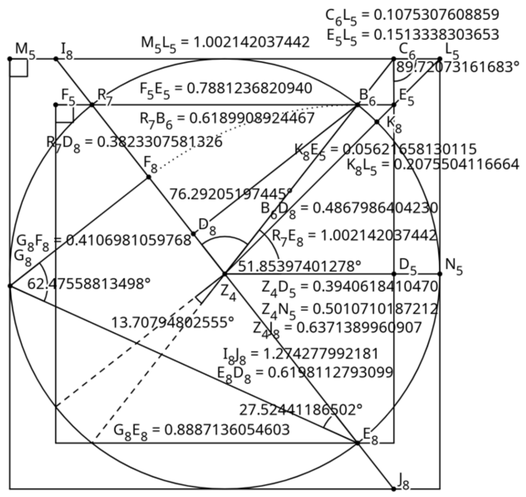

$V_{Co}=\frac{1}{3\sqrt{\Phi}}$

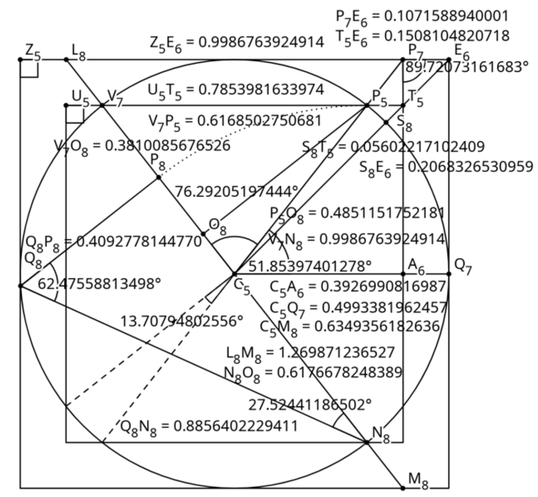

The trilemma that you cannot see above zoomed in many, many times below
Approximate π hides its "shadow" and so hides conflicting values
Greater $\pi \approx 3.152494728376...$, *Lesser* $\pi \approx 3.14159...$

Since the measure of C : D as π/D as $4\sqrt{\Phi^{-1}}$ *is only itself hiding no proportion different from itself as a circle or square, it remains to be the true logos of "π"*

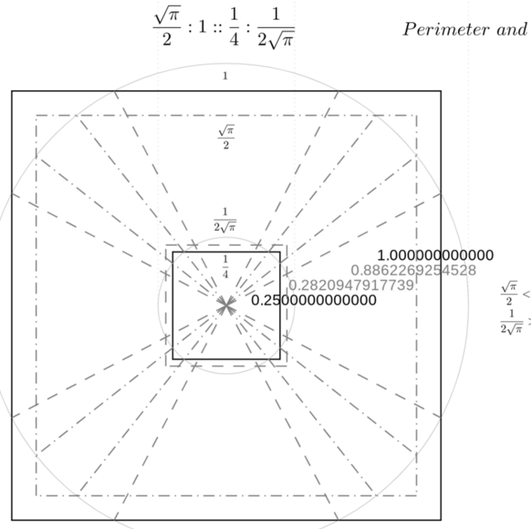

Anti "Squeeze Theorem" Circle Approximation Theorem : A centered equilateral n − gon of either area or perimeter of same measure to a centered circle's area or circumference has all edges forming secants with n − verticies outside the circle

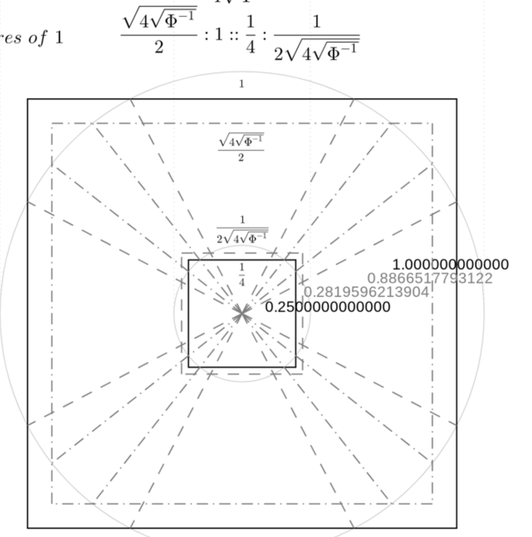

※ *all incorrect trailing angle values in this book can be corrected by a factor of* $\frac{4\sqrt{\Phi^{-1}}}{\pi}$

Here lies four examples using greater and lesser approximate π based square perimeter and angle values, none resolves the trilemma
None of the points on the 1 unit square are perpendicular to the tangent of the approximate perimeter square π value
Neither the greater nor the lesser approximate π's square and angle in relation to the circle has any unique property in relation to the 1 unit square
Only the $4\sqrt{\Phi^{-1}}$ *square resolves the trilemma honestly without using any hidden square*

True π as constructible incommensurate magnitude of Golden Mean *False π as inconstructible commensurate* $n \to \infty$ *sided polygon perimeter*

General Life Lessons

Have Gnosis of thy Soul
Know thine Love within Wisdom of the Divine Self above all else, Seek out noble personalities with noble intellects

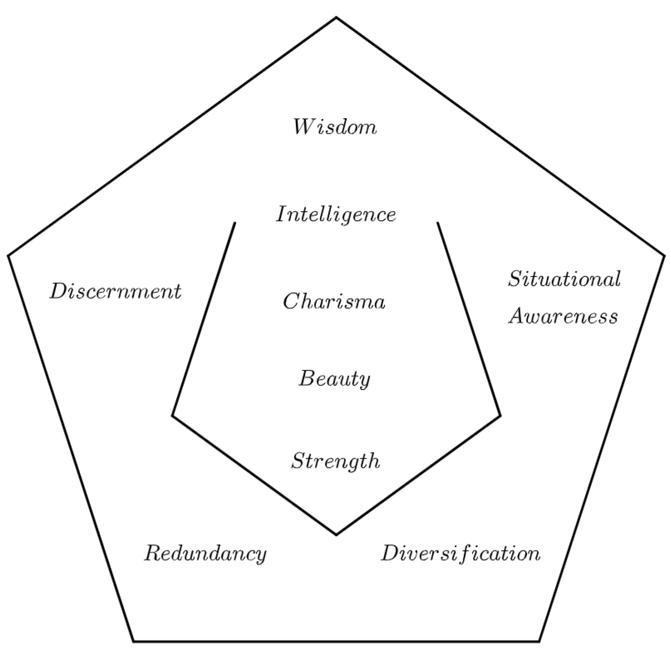

Discernment
Work smarter not harder towards self sufficiency, Compared to what? At what cost? What hard evidence do you have? Learn about truisms, heuristics, fallacies

Situational Awareness
Be aware of your surroundings using discernment, Trust not many, trust in truth alone, Never take any falsehoods and ad hominems from anyone seriously, Never be around those bound to fetters that you don't want to emulate

Redundancy
Have more than one thing of importance in more than one location, One archive is a backed up backup of the original, Four Types of Redundancies : Body : Clean Air/Water/Food/Clothes/Shelter/People/Pets, Hygiene maintenance products, Nicotinic Acid + D − Tryptophan + L − Tryptophan(see : hom3ostasis.com by Dmitry Kats), Trauma Kits, Mind : Analog and Digital Data of Memories, Knowledge, Wisdom, e.g., Digital Files in Portable SSD, Physical Copies of Nondualist Philosophy Books, Personal Diary, Social : Family, Relatives, Friends, Communities, Allegiances, Economic : Tools, Weapons, Ammo, Land, Fuel, Vehicles, Minerals, Crops, Livestock, Networking, Currency, Stocks, Time, Services, Collectables, Miscellaneous Consumables

Diversification
Diversify life skills, Preplan to prepare for all tragedies and eventualities, Diversify Redundancies

Empty is the Many, Beliefs brings forth Ruin
Don't promote trash for anyone, Don't perpetuate personality cult, Don't abuse intelligence, charisma, beauty, strength, Don't go along to get along in being all things to all people by pandering to ignoble personalities and/or ignoble intellects
